Muhammad Ameer Hamza

Flutter Developer | Cross-Platform Mobile Application Developer

Lahore, Pakistan | Open to Remote & Relocation

+92 308 1736926 | hamzakhan00561@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience developing cross-platform mobile applications using Flutter and Dart. Skilled in building responsive, user-friendly interfaces, integrating RESTful APIs, Firebase, and backend services, and implementing scalable state management with Provider, GetX, and Riverpod. Experienced with MVVM and Clean Architecture, reusable widgets, local data storage, and modular application development. Strong focus on writing clean, maintainable, efficient Dart code and delivering reliable, high-performance mobile applications for Android and other supported platforms.

TECHNICAL SKILLS

Mobile Technologies: Flutter, Dart, Cross-Platform Mobile Development, Responsive UI

State Management: Provider, GetX, BLoC/Cubit, Riverpod

Backend & Data: Firebase (Authentication, Firestore, FCM, Analytics), Supabase, SQLite, Hive

APIs & Tools: REST APIs, Postman, Android Studio, VS Code, Git, GitHub

Architecture & Practices: MVVM, Clean Architecture, Dependency Injection, Reusable Components, Localization

PROFESSIONAL EXPERIENCE

Flutter Developer (Freelance)

Aug 2023 - Present

Fiverr | Remote

- Built cross-platform Flutter applications for client projects based on requirements and UI designs, integrating RESTful APIs, Firebase (Authentication, Firestore, FCM), and Supabase for backend communication and push notifications.
- Implemented Provider and GetX for state management within an MVVM-oriented architecture, using reusable widgets to deliver responsive, maintainable client codebases.

App Development Intern (Flutter)

Jun 2023 - Jul 2023

CodeAlpha | Remote

- Developed cross-platform mobile applications using Flutter and Dart, implementing navigation flows and integrating REST APIs and Firebase services.
- Delivered four functional Flutter projects during the internship: To-Do App, Weather App, Expense Tracker, and E-Commerce App.
- Applied responsive UI development and reusable Flutter components across multiple application requirements.

SELECTED PROJECTS

ClearSkin AI - Skin Disease Prediction App (Final Year Project)

Flutter | TensorFlow Lite | Firebase | SQLite | OpenCV | GitHub

- Built a Flutter app that classifies skin diseases from photos using an on-device TensorFlow Lite model achieving 85%+ prediction accuracy, integrated with a REST API backend for predictions.
- Added Firebase Authentication, prediction history, a disease information library, image preprocessing with OpenCV, and confidence scoring.
- Designed a risk-based classification system across 7 disease categories with color-coded feedback and PDF report generation.

Flutter TV Streaming App & Admin Panel

Flutter | Firebase | FCM | Provider | GitHub

- Built a feature-rich TV streaming application with responsive UI and category-based content organization.
- Integrated Firebase Cloud Messaging for push notifications and developed an admin panel for managing content and categories.
- Implemented smooth video streaming and playback functionality with video_player and chewie packages, optimizing for low-latency content delivery.

Bill Checker App

Flutter | Riverpod | REST API | Web Scraping | GitHub

- Developed a Flutter-based utility bill checking application to fetch, parse, and display electricity bill information from multiple providers.
- Implemented Riverpod State Management, REST API integration, and Web scraping to fetch and print bills for its users.

EDUCATION

BS Computer Science

Sept 2022 - July 2026

University of Engineering and Technology, Taxila
