**Mobile Application Developer**

+923081736926 | Gmail | Linkedin | Portfolio | Alipur Tehsil , Punjab, Pakistan

## Professional Summary

Passionate Flutter Developer with strong expertise in Dart, Firebase, and MVVM architecture. Seeking to build impactful mobile apps with clean code and scalable design.

## Academics

Bachelor's of Science in Computer Science

## Skills

**Tools:** Android Studio, VS Code, Postman

**Technologies:** Dart , Flutter framework

**Backend Technologies:** Firebase , Supabase , Hive

**Version Control:** Git, GitHub

**Others:** Rest Api

## Experience

Freelance mobile app development | Fiverr | August 2024 – Present

-Working on different mobile applications projects, handling both frontend and backend development

- Involved in full cycle development, from planning to delivering high quality solutions

I am currently developing a Movie application using MVVM Architecture to enhance seamless user experience.

## Projects

**-Notes app** using **Hive Database (Local Database)**

Built a role-based notepad application to store data locally on user mobile devices. It provides a better facility to store data locally for offline use.

**-Messenger Clone**

This application fully focuses on the beautiful and efficient extended seamless experience for future backend service.

**-Live TV app**

A real time streaming mobile app built to access live television channels having multiple categories like sports, movies, music and Islamic content all over the world.

**-Sadapay Clone**

A perfect clone of the popular Sadapay mobile banking app. This project purely focuses on responsive UI design, clean architecture, code reusability and fintech app prototypes.

**-Health Care app**

This app is beautifully organized and crafts clean, responsive and user centric UI components for a telemedicine-style app.

**-Fitness app**

A tracking solution designed to enpowers the users in archiving their health goals. It works using the best state management technology to boost app performance.

**-My Portfolio App**

This is a complete web-based app deployed to showcase my skills.  It mainly displays my efforts to gain hands on experience for hybrid mobile applications development completely built using Flutter framework and Dart programming language
