SUMMARY

Junior Flutter Developer with 2+ years of freelance and internship experience building cross-platform apps with Flutter, Dart, Firebase, and REST APIs. Built production-style apps including an AI skin disease prediction app and a live TV streaming platform. Skilled in Riverpod, Provider, GetX, and MVVM. BS Computer Science (UET Taxila, 2026), seeking a Flutter Developer role.

SKILLS

Mobile Technologies: Flutter, Dart, Cross-Platform App Development, Responsive UI Development

Backend & Database: Firebase, Supabase, Cloud Firestore, SQLite, Hive

State Management: Provider, Riverpod, GetX, BLoC/Cubit

API & Integration: RESTful APIs, JSON Parsing, Backend Integration, Postman

Architecture & Design Patterns: MVVM, Clean Architecture, Dependency Injection, Modular Architecture

Firebase Services: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Firebase Analytics

Tools & Version Control: Git, GitHub, Android Studio, VS Code

Additional Skills: Localization, Reusable Widgets, Responsive Design

AI Tools & AI-Assisted Development: ChatGPT, Claude, Gemini, GitHub Copilot, Cursor

PROJECTS

1. Live TV App & Admin Panel

Flutter | Dart | Firebase | SQLite | Provider | REST API | MVVM | Flutter Web

- Developed a feature-rich TV streaming application with responsive UI and category-based content organization.
- Integrated Firebase Cloud Messaging for push notifications and developed an admin panel for managing content and categories.
- Implemented smooth video streaming and playback functionality with video_player and chewie packages, optimizing for low-latency content delivery.
- Supports 100+ TV channels across 8 categories.

2. ClearSkin AI - Skin Disease Prediction App

Flutter | FCM | SQLite | OpenCV | Firebase | Dart | Riverpod | Shared Preferences | REST API

- Built a Flutter app that predicts skin conditions from user-uploaded images using an ML model via REST API.
- Implemented image preprocessing, Riverpod state management, local history with SQLite, and push notifications with FCM.
- Added Firebase Authentication, prediction history, a disease information library, OpenCV, and confidence scoring.

3. Bill Checker App

Flutter | Firebase | Riverpod | Dart | Shared Preferences | Web Scraping

- Developed a Flutter-based utility bill checking application to fetch, parse, and display electricity bill information from multiple providers.

- Implemented State Management, REST API integration, and Web scraping to fetch and display bills for its users.

ADDITIONAL PROJECTS

4. ANMOL Marble & Tile Works – Business Website

HTML5 | CSS3 | Tailwind CSS | JavaScript | SEO Optimization | AI-Assisted Development

- Developed a responsive business website for a marble and tile installation company to showcase services, completed projects, and professional craftsmanship.
- Implemented an interactive 3D room visualizer that allows visitors to preview different marble and tile textures on floors and walls.
- Integrated WhatsApp communication, project inquiry features, service listings, and SEO-friendly page content to improve online visibility and customer engagement.

5. Hafiz Salman Quran Academy – Educational Website

React | Vite | AI-Assisted Development | Firebase

- Developed a responsive educational website for an online Quran and Tajweed academy to establish its digital presence and present its educational services.
- Focused on a clean user interface, accessible content structure, and responsive layouts to provide visitors with a straightforward browsing experience across desktop and mobile devices.

EXPERIENCE

Freelance Flutter Developer (Fiverr) Aug 2023 – Present · Remote

- Delivered cross-platform mobile applications using Flutter and Dart, translating client requirements and UI designs into functional, responsive interfaces.
- Integrated RESTful APIs, Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging, and Supabase to support backend communication and notifications.
- Implemented application state management with Provider and GetX, organizing features around an MVVM-oriented structure.

Flutter Developer Intern — Big Brains Aug 2026 – Sep 2026 · Remote, Lahore

- Developed Flutter applications using Dart, implementing navigation flows and integrating REST APIs and Firebase services.
- Completed four functional projects during the internship: a To-Do App, Weather App, Expense Tracker, and E-Commerce App.
- Applied responsive UI practices and reusable Flutter components across multiple application requirements.

EDUCATION

BS Computer Science — University of Engineering and Technology Sep 2022 – Jul 2026 · Taxila
